

Electronically controlled multi-axis compaction system

VTH 4 5 5/12

Dimensions: 21" X 48" **Load:** eg 881 lbs

Features: The 4- shaft-control unit guarantees a resonance free run-up of vibrators at the working frequency and infinitely variable regulation of frequency and vibration amplitudes during operation. Amplitude In/Out possible in fractions of seconds. Thus the product is better distributed and compacted. Synchronized operation absolutely guaranteed. Low current consumption even during the start-up

4 vibrators behind the housing

Control unit with 4 converters:
15.7"x23.6"x31.4" (WxHxD)
