

MARTIN® MT-FAST™ Dry Bulk Trailer Vibrator

Hauling powdered cement, flour, or other difficult-to-unload materials in your pneumatic trailer can increase unloading time, create opportunities for operator injury by having to climb into the trailer, and potentially damage your equipment.

Introducing the MT-FAST™ Dry Bulk Trailer Vibrator

A non-impacting linear vibrator that instantly attaches anywhere on the trailer walls, the MT-FAST™ Dry Bulk Trailer Vibrator has been proven to empty trailers quickly and completely, allowing even the most stubborn materials to flow more easily. With the MT-FAST™ Dry Bulk Trailer Vibrator in place, drivers can empty large loads without having to hammer on the trailer walls to dislodge stuck-on material.

Weighing in at less than 20 lbs., the unit can be positioned strategically, right at the problem area, ensuring optimal material flow. Despite its light weight and portability, the vibrator packs 400 linear lbs. of force and can move even the most difficult materials. The MT-FAST™ Dry Bulk Trailer Vibrator uses the rig's own air supply (less than 15 CFM required) – a unique patented feature (US Patent No. 9,499,085). The low-frequency, high-amplitude vibrator is best suited for materials like powdered cement and flour. Frequency is factory-set for optimal results.

FEATURES

The benefits of MT-FAST™ Dry Bulk Trailer Vibrator include:

- Faster unloading
- Reduced downtime
- Improved operator safety
- Less damage to trailer

MT-FAST™ Dry Bulk Trailer Vibrator Specifications:

- Weight: < 20 lbs.
- Force: 400 linear force-lbs.
- Uses the rig's own air supply
- Portable
- Vacuum-mount
- Explosion-proof
- Washdown-safe
- US Patent No. 9,499,085
